Thank you for your valuable and continued involvement in this study.

Over 3,300 people across the UK are taking part in HORIZONS.

Your participation will help us to understand how a diagnosis of cancer and its treatment affects a person's everyday life and how this may change over time.

About this questionnaire

- This questionnaire is divided into 9 parts
- It will ask about your general health and wellbeing, your experiences of treatment and ongoing care. It will also ask about your thoughts and feelings about cancer as well as how you have been coping, your lifestyle and the support you have available to you
- The information you give will remain confidential and will not be seen by your clinical team
- Please return your completed questionnaire in the FREEPOST envelope provided

You can also complete this questionnaire online

- It's easy to use and is laid out like the paper version
- Saves your progress as you go
- Based on your answers, it will show or hide follow-on questions if relevant
- You create your own secure log-in details

To do this or to find out more, please contact us:

FAQ ***Why is this questionnaire so long?***

- HORIZONS covers a wide range of topics that people affected by cancer have said matter to them and want to know more about
- Please try to answer all the questions but feel free to skip questions if you don't think they apply to you
- You may also want to take breaks

Are my answers still useful for the study?

- Yes, even if you have not experienced problems, or feel you have moved on with your life since your diagnosis or treatment, we still want to know about your experiences
- You may also feel that you have other health conditions that may influence your answers, we consider all aspects of your health and so these answers are still very useful for us to understand your experiences

Why do some questions repeat?

- The questionnaire includes different sets of questions which measure different topics. Sometimes some questions will seem similar but unfortunately, we cannot change them as this will affect how we can interpret the results.
- You will also notice that some questions are repeated from our last questionnaires, this is important for us find out what has or has not changed since then.
